Monte Zeledria - ... - Rifugio Viviani Pradalago

Beschreibung

Direct from the mountain station on the beautiful path. Short secured places up to the peak of Monte Zeledria. Descent further along the ridge to the junction. Here either further along the ridge and then right into the Kessel or directly right through the flank. Due to the cold and strong wind, we decided for the flank. Through wonderful landscape with many flowers, direction Tre Laghi. Due to the tight time, we had to leave the great round trip to the other lakes. Descent to Lago Scuro. Small ascent at first through blockwork and then through primeval forest to the cable car. The cable car is not in operation in summer. Short run down the piste, then back on the path to Rifugio Pradalago. Up to the cable car and descent with the cable car.

Persönliche Anmerkungen

Very nice circular tour, unfortunately without view due to low clouds. Cable car up to Pradalago. 22 Euro for the round trip per person.
